The 92.9-acre Accabonac Preserve is a mature forest that features American beech, white oak, red maple, sassafras, and flowering dogwood. The trails of the preserve connect to the Paumanok Path and provide valuable habitat for a wide variety of sensitive species, including great horned owls, innumerable migrating birds, and the Eastern box turtle.

In January of 1998 the de Cuevas family generously provided the funding to the Peconic Land Trust to acquire the undeveloped woodlands from the Potter family at a bargain sale (less than the fair market value). We thank them for their tremendous gift to the community.

Accabonac Preserve is part of the Town of East Hampton's Water Recharge Overlay District, sitting above the sole source aquifer in Amagansett.

Through land conservation, we are all working together to improve the quality of our important water and natural resources.

La reserva de Accabonac, de 92,9 acres, es un bosque maduro con hayas americanas, robles blancos, arces rojos, sasafrás y cornejos en flor. Los senderos de la reserva se conectan con Paumanok Path y proporcionan un valioso hábitat para una amplia variedad de especies sensibles, como los búhos cornudos, innumerables aves migratorias y la tortuga de caja del este.

En enero de 1998, la familia de Cuevas aportó generosamente los fondos necesarios para que el Peconic Land Trust adquiriera los bosques no desarrollados de la familia Potter a precio de ganga (menos del valor justo de mercado). Les agradecemos su enorme regalo a la comunidad.

El Accabonac Presserve forma parte del Town of East Hampton's Water Recharge Overlay District y se encuentra por encima del único acuífero de Amagansett.

A través de la conservación de la tierra, todos trabajamos juntos para mejorar la calidad de nuestros importantes recursos naturales y de agua.
