

PECONIC LAND TRUST

Conserving Long Island's working farms, natural lands, and heritage for our communities now and in the future.

Features:

- Paumanok Path
- Old Paumanok Path Route
- Unnamed Trail
- Center Trail
- George S. Miller Jr Trail
- Nancy Kane Trail
- Old Springs To Amagansett Trail
- Pine Ridge Trail
- Springs To Amagansett Trail
- Springs to Amagansett Trail & Nancy Kane Trail
- Springs to Amagansett Trail & Paumanok Path
- Contour Line (10 feet)
- Silver Beech, High Point, and Red Dirt Preserves**
- Other Peconic Land Trust Projects**
- Golf Courses

SILVER BEECH PRESERVE

Silver Beech Preserve is 189 acres of mature forest that features American beech, white oak, red maple, sassafras, and flowering dogwood. The trails of the preserve connect to the Paumanok Path and provide valuable habitat for a wide variety of sensitive species including the red-tailed hawk, great horned owl, American kestrel and downy woodpecker.

In February 2003, the Peconic Land Trust received this spectacular gift of land from cousins Maggie de Cuevas and Deborah Carmichael.

The North Amagansett area of East Hampton has benefited tremendously through the generosity and conservation-mindedness of many. This dedication has secured the conservation of over 600 acres of woodlands. The land is part of the Town of East Hampton's Water Recharge Overlay District, sitting above the sole source aquifer in Amagansett.

Through land conservation, we are all working together to improve the quality of our important water and natural resources.

Silver Beech Preserve cuenta con 189 acres de bosque maduro con hayas americanas, robles blancos, arces rojos, sasafrás y cornejos en flor. Los senderos de la reserva se conectan con el Paumanok Path y bindan un valioso hábitat para una gran variedad de especies sensibles, como el halcón de cola roja, el búho real, el cernícalo americano y el pájaro carpintero.

En febrero de 2003, el Peconic Land Trust recibió una espectacular donación de tierras de las primas Maggie de Cuevas y Deborah Carmichael.

La zona de North Amagansett, de East Hampton, se ha beneficiado enormemente de la generosidad y la mentalidad conservacionista de muchos. Esta dedicación ha garantizado la conservación de más de 600 acres de bosques. Estos terrenos forman parte del Town of East Hampton's Water Recharge Overlay District y se encuentran por encima del único acuífero de Amagansett.

A través de la conservación de la tierra, todos trabajamos juntos para mejorar la calidad de nuestros importantes recursos naturales y de agua.

The Silver Beech Preserve is part of a 600-acre trail system managed by the Trust in the Amagansett area that includes neighboring preserves. To learn more about these and other places to explore on Long Island, visit us online at www.PeconicLandTrust.org

Silver Beech Preserve forma parte de un sistema de senderos de 600 acres gestionado por el Trust en la zona de Amagansett, que incluye las reservas vecinas. Para saber más sobre estos y otros lugares para explorar en Long Island, visítenos en línea en: www.PeconicLandTrust.org.
